ABOUT ME

I'm a data-focused professional with 1+ year of experience in data processing, quality checks, and MIS reporting at Genpact. I handle large volumes of financial and operational data daily — keeping it accurate, well-documented, and useful. Skilled in Excel, SQL, Power BI, Python, and AI tools like ChatGPT and MS Copilot. Eager to bring these skills to a global data team.

TECHNICAL SKILLS

Data Analysis & Reporting:	Advanced Excel (VLOOKUP, Pivot Tables, Power Query), Power BI, SQL (Joins, Aggregations, Subqueries), Python (NumPy, Pandas)
Data Management & QA:	Data Processing, Quality Assurance, Audit Trails, Documentation, Process Re-engineering, Workflow Optimization
Research & Tools:	Web-based Research, MS SharePoint, MS Office 365, MS Copilot, Tally Prime, GST Compliance
Financial Data:	MIS Reporting, Financial Statements, Payroll & Insurance Processing (Titan, CORA, Concept One)
AI & Emerging Tech:	LLMs & AI Agents (ChatGPT, MS Copilot, Gemini); Prompt Engineering basics; AI-assisted data research; MySQL

WORK EXPERIENCE

Process Associate – Data Management & Reporting <i>Genpact Madurai, India</i>	<i>Jun 2025 – Jun 2026</i>
- Handled end-to-end payroll and insurance data processing using Titan Imaging, CORA Orchestration, and Concept One — catching errors before they became compliance issues. - Kept thorough audit trails and documentation for every data operation, so the team always had a clear, traceable record of what changed and why. - Pulled together weekly and monthly MIS reports for stakeholders, turning raw operational data into summaries that actually made sense to decision-makers. - Spotted recurring workflow bottlenecks and helped re-engineer the process, cutting down on manual rework and improving turnaround time. - Worked closely with cross-functional teams during bulk data updates and data improvement initiatives, keeping quality consistent across the board.	
Data Analyst Intern <i>Futrik Tech Solutions Madurai, India</i>	<i>Mar 2024 – Jun 2024</i>
- Cleaned, validated, and transformed raw datasets in SQL and Excel — the kind of foundational data work that makes everything downstream reliable. - Built Power BI dashboards from scratch to visualize KPIs and trends, giving internal teams a clear picture of how things were performing. - Took messy, unstructured data and turned it into clean, client-ready reports — learned quickly that good data storytelling matters as much as the numbers.	

PROJECTS

Cyber Security Awareness Study – E-Banking Users <i>Tools: MS Excel, MS Word Domain: Banking Technology & Risk Management</i>	<i>Feb 2024 – May 2024</i>
- Collected and structured survey responses from e-banking users to measure awareness of common cyber threats — ran the full analysis in Excel. - Identified patterns in how users underestimated phishing and malware risks; packaged findings into a research report with practical recommendations. - Kept the entire dataset documented and audit-ready from day one, making the final submission smooth and credible.	
Event Management System – Data & MIS Platform <i>Tools: Python, MySQL, MS Excel, Power BI Domain: Process & Data Management</i>	<i>Oct 2024 – Dec 2024</i>
- Designed a MySQL database to store and manage event booking data — focused on keeping it clean, consistent, and easy to query. - Built Power BI dashboards giving a real-time view of bookings, revenue trends, and event performance — easy for anyone to read at a glance. - Generated MIS reports for auditing and compliance, ensuring a structured paper trail behind every transaction.	

EDUCATION

Bachelor of Commerce (Computer Applications) N.M.S. SVN College, Nagamalai CGPA: 8.15 / 10 P.K.N Matriculation Higher Secondary School HSC: 78%	<i>Sep 2022 – Apr 2025</i> <i>2021 – 2022</i>
--	--

CERTIFICATIONS

Advanced Excel & Tally Prime – Shikshaaa Institution | SQL: Querying, Joins, Aggregations, Subqueries | Power BI – Dashboard Development (Simplilearn/Shiksha)
